Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Contrast — These are opportunities to improve the legibility of your content.

▲ Background and foreground colors do not have a sufficient contrast ratio.	▼
---	---

Navigation — These are opportunities to improve keyboard navigation in your application.

▲ Heading elements are not in a sequentially-descending order	▼
---	---

Internationalization and localization — These are opportunities to improve the interpretation of your content by users in different locales.

▲ <code><html></code> element does not have a valid value for its <code>[lang]</code> attribute.	▼
--	---

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲ Links do not have a discernible name	▼
--	---

Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. [Learn](#) ▼

more in our guide on [conducting an accessibility review](#).

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on [Core Web Vitals](#). [Learn more](#).

Content Best Practices — Format your HTML in a way that enables crawlers to better understand your app's content.

▲ Document does not have a meta description **Description text is empty.**

Mobile Friendly — Make sure your pages are mobile friendly so users don't have to pinch or zoom in order to read the content pages. [Learn more](#).

▲ Document doesn't use legible font sizes — 30.39% legible text

▲ Tap targets are not sized appropriately — 35% appropriately sized tap targets

Additional items to manually check (1) — Run these additional validators on your site to check additional SEO best practices.

Passed audits (9) Not applicable (2) 

Progressive Web App

These checks validate the aspects of a Progressive Web App. [Learn more.](#)

Installable

▲ Web app manifest or service worker do not meet the installability requirements — 1 reason 

PWA Optimized

▲ Does not register a service worker that controls page and [start_url](#) 

○ Redirects HTTP traffic to HTTPS 

▲ Is not configured for a custom splash screen Failures: No manifest was fetched. 

▲ Does not set a theme color for the address bar.
Failures: No manifest was fetched, No `

Content is sized correctly for the viewport 

Has a [meta name="viewport">](#) tag with [width](#) or [initial-scale](#) 

▲ Does not provide a valid [apple-touch-icon](#) 

▲ Manifest doesn't have a maskable icon No manifest was fetched 

Additional items to manually check (3) — These checks are required by the baseline [PWA Checklist](#) but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
